Hiring Manager
Riot Games

Dear Hiring Manager,

I am writing to express my interest in a Software Developer position at Riot Games. I am an ambitious software developer with around two years of professional experience, a strong foundation in full stack development, and a continuous drive to learn, improve, and contribute within collaborative teams. My background combines backend and frontend development experience, and I am motivated by the opportunity to build impactful software in an environment known for creating player-focused games and experiences.

What draws me to Riot Games is not only the opportunity itself, but also a personal connection to the video game industry. Since I was young, video games have been one of my biggest passions, and for as long as I can remember I have followed Riot and the games that were created with the philosophy “player first” which strongly resonates with the way I believe products should be built.

Over the past two years, I have gained experience in both frontend and backend development, working mainly at Bring Global as a Backend Developer with Java, Spring Boot, Hibernate, JPA, microservices, API integrations, MySQL, JUnit, MockBean, Postman, Jenkins, GitHub, and Kubernetes, while also contributing earlier at Codeware as a Full Stack Developer using JavaScript, HTML5, CSS, Kotlin, PHP, and MySQL to build web and mobile applications for event management.

I believe Riot Games would value my profile because I bring a combination of hands-on development experience, adaptability across multiple technologies, and a strong willingness to keep growing. I am comfortable working in Agile environments, collaborating with colleagues, and tackling tasks that require deepening my skillset. Beyond the technical fit, I would bring enthusiasm for the gaming industry and a strong motivation to contribute to a company whose products and identity I have admired for many years.

I am available for an interview and would welcome the opportunity to discuss how my background, technical skills, and motivation can contribute to Riot Games. Thank you for your time and consideration. I look forward to the possibility of speaking with you soon.

Sincerely,
Tomás Negreiro
