JOB EXPERIENCE

CODEWARE, S.A

01/2023 - 07/2023

Worked as FullStack Developer with focus on FrontEnd development for 6 months using Javascript, HTML5, CSS, Kotlin, PHP and MYSQL with the aim to develop a web and mobile applications for event management .

BRING GLOBAL, S.A

09/2023 - 07/2025

Worked as FullStack Developer in international projects related with bank digital transformation, working with an Agile methology taking advantage of Jira and Confluence for easier management :

- Brief project with focus on FrontEnd development and bug fixing for 2 months using Javascript, Angular, HTML5, CSS with the aim to fix and develop some new capabilities in the web application of the bank. Managing deployments with Jenkins, using GitHub for version control;
- I worked for 1 year and 6 months focusing on backend development mainly using Java . My experience includes working with Hibernate, JPA, and Spring Boot, applying different design patterns , creating and managing diferent microservices, Api calls interacting with the banks databases and sending the information to the frontend, using Junit, mockbean and Postman for api and unit testing . I also interacted with the BackBase product (accelarator). Managing deployments with Jenkins, using GitHub for version control, and monitoring microservices status and logs using Kubernetes through an SSH jump server to ensure secure connections and efficient management of distributed services.
